

*Helping the reinsurance industry improve profits and make better portfolio decisions with faster, more comprehensive analytics.*

## Designed for the Reinsurance Industry

Our team has been creating technology solutions for the reinsurance and capital markets industries for over a decade. We created Analyze Re to help turn huge volumes of data into meaningful, business impacting insights. Worldwide reinsurance leaders use Analyze Re to:

- Track and **reduce portfolio risk**, in real-time
- Enable better strategic planning with **portfolio optimization**
- Empower underwriters to make more **informed decisions, faster**
- Extract new business insights with **big data analytics**

## Easy to Use

Analyze Re technology was built to be accessible and easy to use by reinsurers, so there is no need for employees to adapt to the jargon of generic statistics and analytics tools. There are also no programming skills required; we've taken care of the hard part for you. Getting started can be as simple as uploading portfolio data, choosing your objectives, constraints and then

**seeing the results of your first simulation in minutes.**

It is so flexible that any team member, from underwriters to portfolio or risk managers, can update their own models.

## Make Decisions Faster

Analyze Re is engineered for speed. Delivering results in minutes instead of hours or days, allows teams to fine tune simulations more easily while the tools:

- Evaluate millions of possible portfolio combinations to find the most profitable ones
- Support underwriter's hypotheses with hard metrics
- Improve executive teams' visibility of key performance indicators with real-time dashboards

Technical teams can also take advantage of the Analyze Re analytics library to expedite development cycles, shaving months off the time it takes to release new capabilities.
